Subject: Proposed Rulemaking: Water Quality Standards - Class A Stream Redesignations (#7-548)

Dear Secretary DEP McDonnell:

I have fished for trout across Pennsylvania and have lived here for all of my 73 years. Our streams need the strongest protections that we can give them.

I strongly support the Pennsylvania Environmental Quality Board proposal (Pennsylvania Bulletin, March 23, 2019) to redesignate 41 Class A wild trout streams to High Quality-Cold Water Fishes (HQ-CWF).

The benefits of these upgrades are numerous.

Protecting the water quality of these streams with High Quality designations will help ensure that our best wild trout populations continue to thrive. This supports an outdoor recreation economy worth \$29 billion to the state; Pennsylvania boasts 16,000 miles of wild trout water and more than 1.3 million anglers.

At the same time, HQ designations protect water supplies for downstream users, including farmers and industry. More than 175,000 citizens draw drinking water from these streams. We all know that protecting water quality at the source is far cheaper than treating it downstream.

I applaud Pennsylvania for protecting these 41 waters, and urge the DEP to move quickly to advance additional packages of Class A streams that are still awaiting upgrade to HQ status.

Sincerely,

Walter Goodman
