Subject: State Board of Dentistry proposed regulation #16A-4633: Public Health Dental Hygiene Practitioner Practice Sites

CAUTION: ****EXTERNAL SENDER**** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To Whom It May Concern:

What a giant leap for mankind, so-called "Public Health" Dental Hygiene Practitioners would be allowed to tend to the underserved and to children, thus absolving the dental profession of giving serious thought to addressing access to care. Gawd forbid these hygienists should be allowed to practice in other venues, on other patients, that would be a forbidden intrusion on the gold standard of private, solo, f-f-s practice, simply impermissible.

The pandemic of stupidity, cynicism, guile, pretense, condescension, and presumption is still running wild in dental care, as evidenced by this proposal. Get serious or get out of pretending to do something meaningful.

Sincerely yours,

Harris Contos, DMD, MBA
