April 19, 2019

Dear Colleagues of the Pennsylvania State Board of Dentistry,

Based on decades of overwhelming evidence linking oral and systemic health, the proposed rulemaking 16A-4633 PHDHP Practice Site expansion is both logical and imperative.

Dental health professionals must expand access to dental disease prevention in every setting possible to reduce the complex impact of oral inflammation and dental infection on every chronic disease.

Please support the PDHDP practice site expansion.

Respectfully,

Jaclyn M. Gleber
