We support PA DEP's proposed Title V permit fee schedule changes, increasing the fees for new source review, operating permits and for administrating operating permits. The Air Quality Program must have adequate funds to fulfill its mission to ensure public health and the economic viability of the state. It is more than appropriate that the companies that benefit from their regulated right to pollute the air provide the funds to fairly and fully support the monitoring and follow-through of those regulations through adequate permit application fees.
