Subject: Comment received - Proposed Rulemaking: Revision of the Maximum Allowable Sulfur Content Limit for No. 2 and Lighter Commercial Fuel Oil

Re: eComment System

The Department of Environmental Protection has received the following comments on Proposed Rulemaking: Revision of the Maximum Allowable Sulfur Content Limit for No. 2 and Lighter Commercial Fuel Oil.

Commenter Information:

Tim Watkins
Tevis Energy Inc (twatkins@tevisoil.com)

Gettysburg, PA 17325 US

Comments entered:

The transition from 500 parts per million sulfur to 15 parts per million ultra-low sulfur heating oil (ULSHO) will reduce soot accumulation which will ultimately keep heating systems cleaner. Cleaner systems result in higher energy efficiency along with reduced service calls. This will help the ultimate consumer save on heating costs. Pennsylvania is the only state in the Mid Atlantic and New England region who has not yet adopted a ULSHO standard. As a petroleum marketer I fully support aligning our state with the rest of the region to achieve improved air quality and cleaner fuel.
