Comments entered:

To Whom It May Concern:

Lead is a toxin which harms the central nervous system. Any increase to the existing standards will harm many people living in PA. The proposed 150% increase in the nonresidential MSC for lead is unethical. Also, the proposed cleanup standard of 2,500 ppm for lead in nonresidential surface soil is 2.5 times the current standard. Additionally, the proposal doesn't comply with the current CDC standard for lead levels in blood tests.

Please make lead standards in nonresidential surface soil more robust to keep people living in PA healthier.

Thank you for your consideration on this matter.

Sincerely,

Mark Harris
