Comments entered:

I want the air that I, my family, and community breathe to be protected from the harmful releases from oil and natural gas sources.

Methane is an 80x more powerful greenhouse gas than carbon dioxide during the first 20 years after it is released. Unfortunately, methane co-mingles with volatile organic compounds (VOCs) which can cause serious health issues such as asthma attacks, low infant birth weight and cancer.

Start doing the job of protecting our health, not the profits of the industry.
