**RE: Regulation #7-553: Water Quality Standard for Manganese and Implementation
IRRC No. 3260**

Dear Chairman Bedwick and Commissioners:

I am an employee with New Enterprise Stone & Lime Co., Inc("NESL"). My job with NESL provides a good salary for me and my family. My company and myself play an important role in the communities in which we work.

I am requesting your disapproval of Regulation #7-553: Water Quality Standard for Manganese and Implementation, IRRC No. 3260 for the following reasons:

- This regulation ignores the intent of Act 40 of 2017.
- This regulation is discriminatory as it only applies to permitted discharges and there are thousands of unpermitted discharges of manganese across the Commonwealth that are the responsibility of the Department of Environmental Protection (DEP).
- DEP has not developed a complete picture of the cost of this regulation. This regulation will cost my company additional unnecessary expenditures with no significant measure of environmental or health benefits.
- The Department's use of the modifying factor of 3 is outdated and not legally or scientifically required to be used.

If and when EPA develops a nationwide regulation for human health for manganese, DEP could then develop a regulation that is equitable across the Commonwealth and accounts for all discharges of manganese into PA waters.

Sincerely,

Greg Willi
