Comments entered:

Hello, my name is Jade Davis and I am speaking on behalf of being a private citizen. I am from Bridgeville, Pennsylvania. Currently, I am in high school and I commute to Lincoln Park Performing Arts Charter School, which is located in Midland, Pennsylvania. This area is know for its nuclear and cracker plants. When I was accepted into Lincoln Park, my parents had to sign a nurse's form for me to take a potassium iodide pill, just in case these plants ever leak or explode. Obviously, RGGI is a stone toward eliminating greenhouse gases, but what about the past effect? That has already been done, I don't want to find out after I graduate that I have lung cancer due to pollution that I have already been exposed to. So my ask is, that this deal includes protection for those who have lived, worked, and went to school in communities where the damage has already been done. And, I hope justice will be served when health becomes at risk.
