Comments entered:

Carbon Taxes don't work. Carbon Taxes are counterproductive and uneconomic. Carbon Taxes will not ameliorate climate change. We don't have any carbon taxes at present, proving any beneficial results to the climate or economy is therefore the burden of those who wish to enact same.

Just another government grab for power; an invitation for fraud and graft.

Carbon taxes are undeniably regressive, and not in the interest of the poor or working class of this , or any other state or political subdivision.
