To whom it may concern:

I am writing to express my full support for joining our mid-Atlantic neighbors in the Regional Greenhouse Gas Initiative to reduce greenhouse gasses and begin to reduce the carbon footprints that contribute climate change. Climate change is a scientifically proven entity with an exponentially growing impact on locales throughout the US not to mention the world. National and international security (including food production) are dependent on our ability to slow our contributions to climate change and we all must do our part as individuals and as a community (including industry).
