Attached are comments that my students from my 9th grade 3rd period Ecology class wished to share:

Dear Environmental Quality Board,

My name is Kevin Navarro and i'm a freshman at reading high school. I'm writing this letter regarding the carbon dioxide cap and trade plan.

As a 9th grade student at RHS , greenhouse gases raise quality and environmental justice issues in my community because, their are a lot of civilians that suffer from respiratory diseases from the smog and air pollution another reason why i support this plan is because there are a lot of food supply disruptions that are caused by the pollution out in the state.

In conclusion i hope that carbon dioxide is reduced in Pennsylvania because i have family members that suffer from respiratory diseases and it makes it hard for them to interact outside.

Sincerely,
 Kevin Navarro Jr, 9th grade, RHS

Dear Environmental Quality Board,

I support Pennsylvania's participation in the carbon dioxide cap and trade plan because i want to help the world get unpolluted and take care of Mother Nature

I believe that the Green Jobs created will...

1. Not release pollution in the atmosphere
2. Help the environment because we will use more electrical stuff.
3. make more electric cars, lawn mowers, ect....

In conclusion, I am glad that Pennsylvania has a plan to reduce greenhouse gases because that is where some of the Methane and Carbon Dioxide come from, and will stop them from releasing gasses to pollute the earth and make more people have health problems.

Yours Truly,
William G.

Dear Environmental Quality Board,

I support Pennsylvania's participation in the carbon dioxide cap and trade plan because...the pollution is not good for our economy.

I believe that the Green Jobs created will...

1. decrease the use of pollution.
2. create renewable energy
3. help us reduce reuse and recycle

In conclusion, I am glad that Pennsylvania has a plan to reduce green house gases because... it can help us reuse instead of creating pollution

Your's Truly, francisco candelaria
