Comments entered:

These are my 5th period Ecology students from the 9th grade. They wish to share their opinions on this Rulemaking.

Hello,

I am writing because I feel that co-generation using Waste coal is a bad idea because it is throwing aluminum pollution into waterways , and its also causing acid drainage that is killing our streams. And by that it is also releasing toxic pollution into our air.

I know that it is part of the Carbon Dioxide Cap and Trade scheme that seems to be good for the environment, according to Investopedia...

- 1.Cap-and-trade energy programs are intended to gradually reduce pollution by giving companies an incentive to invest in clean alternatives.
- 2.Companies that surpass the cap are taxed, while companies that cut their emissions may sell or trade unused credits.
3. The total limit (or cap) on pollution credits declines over time, giving corporations an incentive to find cheaper alternatives.

Thank you for addressing my comments about...Carbon Dioxide Cap and Trade.

Yours Truly ,Gabiela Negron

Hello,

I'm writing to you today to support the Carbon Dioxide Cap and Trade plan.

As a 9th grade student at Reading High School, greenhouse gases raise equity and environmental justice issues in my community because... it freshens up the air and atmosphere and it can help with health problems such as breathing problems and people with asthma.

- 1.It makes the air clean
- 2.It can give us a better community
3. And we won't have trouble breathing

In conclusion, I hope that carbon dioxide is reduced in Pennsylvania because... it's bad for us and it can destroy the atmosphere and it brings major health problems for people with health problems.

Sincerely,
Damion

Dear Environmental Quality Board,

I support Pennsylvania's participation in the carbon dioxide cap and trade plan because...

I believe that the Green Jobs created will...

- 1.motivate people about the environment and focus energies around green work full time.
- 2.Help pursue green education, volunteering, etc.
- 3.They hae self-employment and entrepreneurship.

In conclusion, I am glad that Pennsylvania has a plan to reduce green house gases because is really good for the environment.

Your's Truly,Mercades Wertz

Hello,

I'm writing to you today to support the Carbon Dioxide Cap and Trade plan.

As a 9th grade student at Reading High School, greenhouse gases raise equity and environmental justice issues in my community because...

- 1.smelling co2 can cause variety headaches, dizziness, difficulty breathing, sweating, tiredness, increased heart rate, elevated blood pressure,
2. Higher co2 is generally better for plant growth Temperatures rise, and the causes extreme heat and can have several impacts on plant growth, mostly certain crops like corn.
- 3.But co2 works to trap heat close to Earth It helps Earth hold the energy it receives from the Sun so it doesn't all escape back into space. If it weren't for co2 , Earth's ocean would be frozen solid.

In conclusion, I hope that carbon dioxide is reduced in Pennsylvania because We need to be healthy we need the right amount of co2 too much will kill us and not alot of it will freeze us to death

Sincerely,Danyl

Hello,

I'm writing to you today to support the Carbon Dioxide Cap and Trade plan.

As a 9th grade student at Reading High School, greenhouse gases raise equity and environmental justice issues in my community because...

Its bad for our bodies

Its bad for the atmosphere , it will worsen global warming

3. They cause diseases , and cause extreme weather

In conclusion, I hope that carbon dioxide is reduced in Pennsylvania because... it would help humanity and planet

Sincerely,
Xaniyah Smith
