I am writing in support of RGGI. Please support this Proposed Rule making. IT will help to reduce air pollution, improve public health, help individuals lives and health, and begin to address the real problem of climate change brought on by CO2 emissions from sources in Pennsylvania.

The rule making would require a drop of about 31 percent. It would reduce emissions of smog-forming oxides of nitrogen and reduce sulfur dioxide emissions by 67,000 tons.

This is an opportunity for Pennsylvania to take real action to reduce air pollution through this program and we need to seize it.

Thank you for your time and consideration.
