Re: Proposed Rulemaking: #7-559 - CO2 Budget Trading Program

To the members of the Environmental Quality Board,

On behalf of the [organization/council] and its affiliated unions, this is sent to express our opposition to DEP's proposed regulations seeking to limit state CO2 emissions through participation in the Regional Greenhouse Gas Initiative (RGGI).

As three different advisory committees have made clear through their respective votes on the proposed regulations, Pennsylvania's participation in RGGI will not benefit the state economically or environmentally. Participation in RGGI will quickly accelerate the closure of

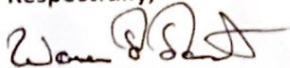

Pennsylvania's remaining coal-fired power plants, eliminate thousands of good-paying jobs, including jobs held by members of our affiliated unions who depend on work in the power generating industry to sustain their careers, and remove \$2.87 billion in economic activity from the state economy. In addition, communities that depend on tax revenue from currently operating power plants to fund school districts and essential services will be devastated and will take years to recover.

From an environmental standpoint, DEP's RGGI modeling confirms that Pennsylvania's participation in RGGI will not yield any meaningful reduction in statewide or regional CO2 emissions by 2030 beyond what is occurring through current market forces. Instead, participation in RGGI will force the premature closure of the state's remaining coal-fired power plants, and some older natural gas-fired power plants, and shift generation and emissions to neighboring, non-RGGI states.

It should also be noted that consideration of the proposed regulations is occurring at a time when the challenges of the current COVID-19 pandemic have substantially compromised the public's ability to engage state officials. In fact, the Air Pollution Control Act requires hearings on proposed regulations to be held in affected communities. Yet, a series of virtual public hearings has been offered by DEP as a substitute without any clear method to validate community engagement and despite the lack of access to broadband internet service by many residents of affected communities. Under these circumstances, at a minimum, consideration of the proposed regulations should be delayed until full engagement with affected communities is possible.

Given the above, we ask the Environmental Quality Board to reject the proposed regulations seeking to authorize Pennsylvania's participation in RGGI. Thank you for considering our position.

Respectfully,

Warren F Faust

President
