If this would go through it would kill the economy and school districts in and around Indiana County. Our state prides itself on being a energy generating state. It provides great jobs and revenue for the counties and state. If the governor would sign this, it would be a death sentence to our countries and state. He may not care while he sits in a position that he was voted for and not listening to us or our representatives, since he is make a killing no doing his job, but us normal citizens that pay his wages care greatly.
