Comments entered:

Carbon reduction is essential to our success in securing a livable planet for all species, now and in the future. For too long, citizens have been provided a false equivalency of climate action vs. jobs. Climate action is now urgent, and poison jobs simply do not compete in importance. The fact that many more jobs could be provided in renewable energy and the infrastructure that supports it, shows the deceit by the fossil fuel industry and certain lawmakers. Carbon reduction must be instituted.
