Comments entered:

Here in Lancaster County we have some of the worst air pollution in the State. A coal fired electric generation plant is located along the Susquehanna River is partly responsible. Air pollution is dangerous to our health. In addition to reducing pollution RGGI would provide funds for making structures more energy efficient, reducing energy usage. I support Governor Wolf's idea to join RGGI through executive order. Our General Assembly, unfortunately, has been listening to the fossil fuel lobbyists, rather than representing us, the people of the Commonwealth.
