Comments entered:

Climate change is an existential threat. It will threaten Pennsylvania's economy through increased natural disasters and economic dislocation in other regions, and it will harm our natural resources. I want my daughter to grow up to a vibrant and healthy world and have access to things like cold, clear streams where she can continue to fish for our native trout. Clean energy jobs can also provide a financial benefit to our state. At a minimum, Pennsylvania should join RGGI to reduce power plant pollution that leads to public health impacts and climate change. Please act swiftly and urgently on climate change.
