Comments entered:

The Environmental Quality Board proposes to amend the interstate pollution transport reduction to establish a program to limit the emissions of carbon dioxide (CO2) from fossil fuel-fired electric generating units (EGU) located in Pennsylvania with a nameplate or greater than 25 megawatts.

I support this endeavor and I wish to express my ongoing concern about our ongoing efforts to curb greenhouse gas emissions. We applaud these efforts to reduce climate change pollution from our electric power plants.

Yours truly,

Nikitas Zervanos, M.D.
