Comments entered:

I am a resident and also an employee of a Indiana County Energy Producer. I see these steps as being extremely detrimental to the energy industry how about instead of Killing of the industry be a supporter and help give incentives to these Companies that are cleaning up the Old refuse piles of Coal they have already made great strides in cleaning up the streams and rivers that once were orange and now are places people enjoy for recreation they still have work to be done and if you kill off the Coal Plants this will never get Finished. You need to take a Tour of this Coal Generation Plants in Indiana County Pa and then maybe you will understand that these plants have changed a lot with all of the new emissions standards that have already been implemented at these Generating Stations. Make an Effort to get out and see for your self instead of sitting in an Office in Harrisburg talking to your special interest groups you were Elected to serve All the people of Pennsylvania not just a select group! It's time the elected people of PA try to restore the People's Trust in are Government! It's 2020 and we still have the Technology to make this plants cleaner with out shuttering the doors we need a Diversified energy portfolio not just Wind and Solar. Thanks for your Time if you took the effort to read this letter.
