Comments entered:

Hello I am writing this short letter in response to the efforts of PA State Gov attempt to tax me and my family out of a job. This is not the time or place for this tax plan to be looked at. First the electrical grid is not sustainable without the help of coal & gas power plants, we would risk black outs and increase in electrical bills that would be passed on to the consumers who are already dealing with massive financial blows forced on them from the covid-19 effects that will take years to correct. Also so many more families would be put out of work and the jobless claims would go up significantly. This is not something our state needs now or anytime soon. Please throw away the RGGI idea, my wife & children are depending on me to keep my job.

No attachments were included as part of this comment.
