## Comments entered:

As a lifetime resident of Pennsylvania and environmental scientist, I cannot stress enough the importance of this legislation that will result in decreasing Pennsylvania's carbon emissions. As the third leading producer of carbon emissions in the country, it is paramount that Pennsylvania work with the Regional Greenhouse Gas Initiative, to reduce our emissions as the RGGI has effectively done in other states.

I do not believe this will hurt the economy and given the proper approach can stimulate the economy by creating new job opportunities and markets. I firmly believe we can reduce emissions and have a healthy economy.

We have a responsibility to future generations to act now to avoid the worst consequences of climate change. We have a responsibility to land on which we live as well as to each other. Please act responsibly and do the right thing for our communities, the land and our children in passing this legislation.
