Southampton, PA 18966 US

Comments entered:

I do not support this rulemaking. Climate change of 1.8 degree F over 110 years hardly shows need for hobbling Pennsylvania's energy industry by taxing them out of business. As noted, "Considering that this Commonwealth has the fourth leading CO2 emitting electricity generation sector in the country, this proposed rulemaking is a significant component in achieving the Commonwealth's goals to reduce GHG emissions. Although this proposed rulemaking will not solve global climate change, it will aid this Commonwealth in addressing its share of the impact". It seems to me that the means of address its share will be by forcing Pennsylvania residents and companies to pay for it and will not actually have any beneficial effect on the environment. I have seen some of the green energy initiatives that harvest forests and send the wood to chippers for biofuel feed in the US and overseas. What a scam! I'd much rather burn the plentiful resource of fossil fuels found in PA safely then support this racket.
