To whom it may concern,  
I completely disagree with RGGI. It will completely destroy our local economy, destroy and completely eliminate thousands of life and family sustaining jobs. RGGI would have a devastating effect on the people of the great state of PA. Why would we want or need to purchase our power from another state? We make our own CLEAN power here. If we enter into RGGI, it will only line the pockets of the already greedy politicians in Harrisburg and the burden of higher electric bills, will be on the backs of the already struggling Pennsylvanians. We can NOT afford to let RGGI pass and become law. This would not only affect the power plant workers, but have a trickle down affect for small businesses across the state. We are a unique state with the ability to produce power to supply the East coast. Don't squander our opportunities and send our jobs to WV and OH. I am a family this will affect. If we lose our power plants, we will lose our livelihood and lose the ability to provide for our family. Please do what's right for PA and opt out of RGGI!
