This state does not need another tax of any kind. leave the gas industry alone. This is what killed the coal industry in this state and cost thousands of jobs in which many people being of near retirement age could not find other employment. This is not a state by state problem. This is a global problem... if in fact there even is one. If you could stop the winds blowing from the west then I would say maybe but you can't. You are killing our state for no reason. I say no to anymore carbon tax on Pa.'s electric production and no to the Regional Greenhouse Gas Initiative. If Governor Wolf wants to do something for Pa. get to work on welfare reform. This state needs good paying jobs not more taxes on the industry that is providing them. Again I say NO NO NO to any carbon tax on the Pa.electric production.
