Comments entered:

I fully support the Environmental Quality Board (Board) proposal to amend Chapter 145 (relating to interstate pollution transport reduction) to add Subchapter E (relating to CO2 budget trading program) to establish a program to limit the emissions of carbon dioxide (CO2) from fossil fuel-fired electric generating units (EGU) located in this Commonwealth, with a nameplate capacity equal to or greater than 25 megawatts (MWe) as set forth in Annex A.

I am very concerned about global warming and climate change and support all efforts to mitigate it. NOW is the time to act.
