Comments entered:

Rather than a cap and trade approach that will harm many within the commonwealth with higher electric rates, I suggest that you look to nuclear power which has received a "bum rap" from misleading commentators over the years.

Nuclear is still the one source of nonpolluting electric power that has had extremely low mortality associated with any malfunctions. Cap and trade is just another form of taxation that would have little effect on the environment but perhaps a larger effect on the bloated political system who make bad decisions on how they know where to spend our money!

No attachments were included as part of this comment.

Please contact me if you have any questions.

Sincerely,
Jessica Shirley
