Vote No. The governor has hurt the working people with his policies, we do not need a tax added to our hardships. Regarding, The Department is also seeking comment on potential approaches that would assist the transition of workers and communities in a just and equitable manner as this Commonwealth continues on a path to cleaner electricity generation- this does not work, the idea sounds good on paper from people who are not at risk of losing their job and their livelihood and has no empathy for the people losing their job and paycheck, security and stability. My dad lost his job during Obama due to similar regulations, telling someone middle age supporting a family to retrain is not a good alternative for the family dealing with new stress, anxiety and depression due to job loss. No solar panel or windmill job came along and we suffered financially and mentally for a couple years. Vote no, stop lining your pockets on the backs of those that want to work.
