Comments entered:

I support this initiative.

This conforms with the intention of the General Assembly, and will create new jobs and new business opportunities which are relevant for the future of PA. This is necessary to protect public health and safety, especially in low income areas. This will help to reduce respiratory distress across the state, reducing the load on hospitals, and increasing everyone's general welfare.

It will also promote renewable energy technologies, creating new business opportunities and new jobs, giving PA's dying coal industry a path toward the future - a better future for all residents.

RGGI is feasible, reasonable, and necessary for Pennsylvania.
