## Comments entered:

I strongly support PA establishing a program to limit carbon dioxide emissions from fossil fuel-fired electric generating units.

Renewable energy is the future. By adopting a carbon pricing program, we can incentivize companies based in Pennsylvania to invest in renewable, clean energy for our state and clean energy jobs for Pennsylvanians.

As a young adult, I am inheriting the climate crisis. The longer we allow fossil fuel energy to be artificially cheap, the higher price that young Pennsylvanians like myself will have to pay for the stability and quality of life that generations before us were able to take for granted.
