Comments entered:

Everything we can do to reduce carbon emissions is critical. COVID-19 is nothing compared to the coming climate catastrophe. I have no children to worry about, but I have plenty of young nieces and nephews, cousins, and cousins once and twice removed. Great jobs will mean nothing if we are flooded with climate refugees, blown about by hurricanes and tornadoes, or suffer from the economic collapse brought on by climate disasters in other parts of the country. Please approve this minor change and any other changes that will advance energy technology that reduces carbon emissions.

Sincerely,

J. Lamar Freed
