I am opposed to PA joining RGGI. Our electric bills and taxes are too high now and we don't need further burdens piled on our backs by this governor and a bunch of bureaucrats. I'm sure the vast majority of voters don't know about this plot so how about being transparent and putting this on the ballot as a referendum? Or better yet, those who believe in the global warming conspiracy (not that it is warming, but that puny man can stop it) reach into their own pockets and fund this nonsense themselves.
