Re: eComment System

The Department of Environmental Protection has received the following comments on Proposed Rulemaking: CO2 Budget Trading Program (#7-559).

Commenter Information:

Larista OHarra
(laristajohn2018@gmail.com)

Indiana County, PA US

Comments entered:

I would like to take the time to comment on the RGGI. I understand peoples concern for the environment and how it wod be great if we all had solar panels on our roofs and battery operated cars. But as you sit in your nice warm house and drink your coffee look outside in Pa we don't get enough sun or wind to power everything for every bodys needs. So before you shut down the power plants that provides my work as a coal bucket driver. My proposal is this Indiana county should start having rolling black outs and all the bunny huggers that don't want cars then try living the Amish life for a year or two!! No electricity to power your I phone or big TV. This proposal is absolutely stupid to core written by a placating government.

No attachments were included as part of this comment.
