Hi my name is Aliesha and I am writing to share the reason why the medical team I feel is very necessary to have onsite.

I am a patient of the Ethos Dispensary.

Medical Marijuana is very new to me. I stop medical marijuana because my doctors are running different tests on me. However, I will start back on medical marijuana. I'm very excited to meet with the medical team onsite again when I return to continue my journey. I need the medical team guidance not just by phone but when I arrive. I have had many questions to ask when I'm onsite and I feel more comfortable that I'm getting assisted by the medical team. Talking by phone is not the same as interacting with the medical team in person. I need that support when I arrive. I'm a person that is very cautious about my health. So when I arrive I want the medical team assisting me because I will feel comfortable knowing I have the medical team there for all my questions. In my experience with the Ethos Dispensary medical team it has been great. The medical team was working with me to find the best products for me. I feel like they actually care about my well being. Like, they are apart of my journey. Any questions I have the medical team is there to assist me on the spot. It's more convenient for me and makes me feel more comfortable to purchase the products that's being recommended. Just me being new and being scared all at the same time not having the medical team there this is worsening my anxiety. Having the medical team there gives me comfort and hope. Can y'all please take into consideration that their are people like me that is new and need onsite help. Also, there are people that are not tech savvy who needs assistance in person. Please consider leaving the medical team onsite because I need it and so do many others I know. It's not a good idea to not have them onsite. Having a medical team onsite makes a huge difference. My comfortability is very important and having the medical team onsite makes me want to purchase the products and try different ones that could fit me with confidence because I'm actually interacting with them in person instead of by phone. Plus it's more professional which makes me feel a lot better.

If the medical team are no longer onsite I won't feel comfortable anymore to continue my journey with medical marijuana. Please keep the medical team onsite !
