don't allow dispensaries to sell illegal items that cannot be consumed in a legal way
most dispensaries sell a product called moon rocks or caviar, and those cannot be consumed without literal ignition.
ignition is still an illegal form of taking your medical marijuana. either allow people to smoke or regulate dispensaries more.

add cops to parking lots of dispensaries. people sell their medications in the parking lot or use their mmj products in parking lots and then drive dangerously. literally every single time i go to a dispensary, there's someone puffing on their disposable thc vape in the parking lot.

allow 18 year olds inside dispensaries if they have their card. the parental caregiver nonsense is just inconvenient and unnecessary. it just causes distress to parents and patients. if they're old enough to die for our country, why aren't they old enough to medicate themselves from the trauma that comes with that?

a lot of the laws about gun ownership and mmj are nonsense too, but i don't know if this has anything to do with that

dispensaries have a huge problem of being allowed to advertise sharing/selling mmj products because of the fact that they're all HQ'd in recreational states, so we get recreational marijuana advertising. stuff like "share a bowl at your superbowl party" advertisements is highly illegal and unethical. this needs to stop, the glamorization of a prescription medication BY THE PEOPLE THAT HAVE OUR MEDICATION is ridiculous and disgusting.
