**Subject:** [External] Supporting Science in Education

ATTENTION: This email message is from an external sender. Do not open links or attachments from unknown sources. To report suspicious email, forward the message as an attachment to CWOPA\_SPAM@pa.gov.

I am writing as a parent, community member and physician.

With the proposed updated guidelines in science education, I want to make sure I express my strong support for teaching strong science, climate change and evolution in children's science education all the way through the educational system including middle and high school.

As we have seen this last year with the pandemic, too many adults do not understand the science, too much is being misconstrued and politics is playing too big a role in countering safety standards.

Our children need and deserve better to be smart, educated and informed citizens that lead the world in science.

Please support important science standards and education to include evolution, climate change and technology.

Mariam Mahmud, MD  
Chalfont, PA
