Regulation No. 7-561 (#3310)
Environmental Quality Board
Additional RACT Requirements for Major
Sources of NOx and VOCs for the 2015 Ozone
NAAQS

On July 14, 2021, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Environmental Quality Board (EQB). This rulemaking amends 25 Pa. Code Chapters 121 and 129. The proposed regulation was published in the August 7, 2021 *Pennsylvania Bulletin* with a public comment period ending on October 12, 2021. The final-form regulation was submitted to the Commission on August 10, 2022.

This final-form rulemaking adds additional Reasonably Available Control Technology requirements and emission limitations for certain major stationary emissions sources.

We have determined this regulation is consistent with the statutory authority of the EQB (35 P.S. § 4005(a)(1) and(8)) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

BY ORDER OF THE COMMISSION:

This regulation is approved.

George D. Bedwick, Chairman
