Title: Registration of Naturopathic Doctors

I support registration of Naturopathic doctors a providers in PA because as a provider of holistic health services myself, I've witnessed first hand how much a holistic approach to health can address many health concerns that are not otherwise well known to allopathic medicine alone. Many patients with chronic health issues would be well served by applying not only Western medicine, but also naturopathic medicine to address their health issues. This would reduce the burden on our medical system of those with chronic disease, get to the root cause of health issues, and help Pennsylvanians with health issues have better quality of life.
