Comments entered:

Hello,

I have one simple comment for the correction of a typo related to footnote "b" associated with proposed revisions to Table I Emission Limits of VOCs in Surface Coatings by Process Category Weight of VOC per Volume of Coating Solids. The footnote "b" should be corrected as follows: "...multiply the limit by (3.785 liter/gallon)". The Department used a comma instead of a period which would otherwise cause the regulated community to perform an improper calculation when converting from metric units to English/Imperial units.

Thank you.
