Regulation No. 7-568 (#3329)
Environmental Quality Board
VOC RACT Requirements for Shipbuilding
and Ship Repair Surface Coatings, Large
Petroleum Dry Cleaning Facilities and
Synthetic Organic Chemical Manufacturing
Industry Processes for the 2015 Ozone
NAAQS

On January 4, 2022, the Independent Regulatory Review Commission (Commission) received this proposed regulation from the Environmental Quality Board (Board). This rulemaking amends 25 Pa. Code Chapters 121 and 129 by adding §§ 129.63b and 129.71a and amending §§ 121.1 and 129.52. The proposed regulation was published in the January 29, 2022 *Pennsylvania Bulletin* with a public comment period ending on April 4, 2022. The final-form regulation was submitted to the Commission on October 13, 2022.

This rulemaking establishes presumptive volatile organic compound emission reasonably available control technology (RACT) requirements and RACT emission limitations for the following control techniques guidelines source categories: shipbuilding and ship repair surface coatings; large petroleum dry cleaning facilities and synthetic organic chemical manufacturing industry air oxidation, distillation and reactor processes.

We have determined this regulation is consistent with the statutory authority of the Board (35 P.S. §§ 4005(a)(1) and (a)(8)) and the intention of the General Assembly. Having considered all of the other criteria of the Regulatory Review Act, we find promulgation of this regulation is in the public interest.

BY ORDER OF THE COMMISSION:

This regulation is approved.

George D. Bedwick, Chairman
