Docket Number: L-2019-3010267

**Independent Regulatory
Review Commission**

Concerning docket L-2019-3010267, I live within an 1/8 of a mile from the Mariner East Pipeline and the Williams pipeline in West Whiteland Township, PA. My concern is that the current regulations in PA do not sufficiently protect the safety of residents that are in the possible blast zone of any pipeline. Nor is the environment protected adequately from irreparable damage to the eco-system. The proposed rule modifications must be implemented and not watered down by corporate desires to minimize the cost to them to construct and maintain such pipelines. The people in proximity to pipelines must not be held "hostage" to corporate profit motives.

Please ensure codification of the proposed new regulations without effect of industry change.

Regards,

Theodore E Stand
