Comments entered:

Hello,  
 I am very interested in keeping hazardous 'forever' chemicals like PFAs out of our water systems. Not only should our drinking water be safe, but our waterways as well. I urge you to follow through with setting stricter standards for the level of chemicals like PFAs in our water. We have seen the negative effects of poor waste management during the pandemic where there was more medical waste and less waste management workers to handle the waste at the facilities. Products like cookware and carpets have undoubtedly leached out dangerous chemicals when not disposed of properly during the past few years. I also think it is important to restrict the chemicals when we are aware of point pollutant sources like military bases. I applaud the work that is being done and urge us to set and enforce strict standards.  
 Thank you for your time!
