Dear Pennsylvania DEP,

As the mother of two young children whose bodies and brains are developing and are at their most vulnerable, I urge you to adopt state Maximum Contamination Levels (MCL) for perfluoroalkyl and polyfluoroalkyl substances (PFAS) in drinking water. We need to protect Pennsylvanians from harmful chemicals. PFAS is removed from drinking water through treatment, which requires that an MCL be set.

I encourage you to make sure the proposed MCL for PFAS:

- Implements more protective standards- The proposed MCL standards for PFOA (14ppt) and PFOS (18ppt) are not strict enough. The PFOA MCL should be as low as possible but not to exceed 6 ppt and the PFOS MCL should be no greater than 5 ppt. When PFOA and PFOS are found combined in water, their combined concentration should be no higher than 13 ng/L. These recommendations are based on toxicological risk assessments.
- Expands the compounds covered- MCLs should be set for more PFAS compounds, especially those DEP sampled for and found at some level within the state's environment. That includes PFNA, PFHxA, PFHxS, PFHpA, and PFBS.

- Requires rapid implementation- Do away with monitoring delay in the proposed rulemaking whereby initial compliance monitoring for water systems serving a population of greater than 350 persons begins January 1, 2024 and initial monitoring for water systems serving a population of less than or equal to 350 persons begins January 1, 2025. All systems included in the rulemaking should be required to start sampling immediately.
- Ensure rigorous and ongoing monitoring- Sampling should be required annually for all systems with no waivers for any systems. For systems with detections above the MCLs, monthly sampling should be required until the level is reduced below the MCL, then quarterly monitoring should be allowed before returning to the annual requirement.
- Ensures equal protection for all- The proposed rulemaking only applies to Public Water Systems. This leaves a large number of Pennsylvanians out of the sampling. All water supplies, including individual private water wells, should be included.

Thank you for taking action. Please act to protect the health of my children and all Pennsylvanians.

Sincerely,

---
