My husband speat over three years in our marsing bone from Oxider 1977 until be died there February A. 2011. I spear a lot of time with him and the others three—where patterns with family and the case smit! I observed twy appropriate care by the masses and adea. They have just has the does not expect that the cost of their to find appropriate equipment to allow 1860 to stand and walk. He suffered from Levy Body demonstrate equipment to allow 1860 to stand and walk. He suffered from Levy Body demonstrate with a constant loss of a sense of balance. He fill Requesting has without manying fractures or injuries. He was seldom slates, having an after or speed present when he support. He forthe slept in the bring some one as mat where suff cound keep an eye on him. He was truly well caused for. Staff also worked well with others to pass on observations and to keep up constant unsprecision of him.

managed such constant care for him. Staff also helped families understand the changes patients likely make and what interventions help. On the whole, I felt that that this unit really worked as a team to provide exceptional care. Please do not saddle them with additional paperwork that would take them away from very effective care.,

Susan Betts, MSW, LCSW
