Subject: Ch.95 proposed new regulations for wastewater treatment requirements

Dear DEP: Environmental Quality Board,

I would like to include the following suggestions for the upcoming proposal:

Number 1: DEP should not weaken their proposed discharge standard for TDS.

Number 2: DEP should add discharge standards for those contaminants that are frequently found in Marcellus Shale gasdrilling wastewater.

Number 3: DEP needs to ensure that all aspects of generation of Marcellus wastewater are regulated.

Number 4: **DEP should stop giving out more drilling permits until wastewater rules are in place.**

Sincerely,
John Bromberg
