Re: eComment System

The Department of Environmental Protection has received the following comments on Proposed Rulemaking: Control of VOC Emissions from Oil and Natural Gas Sources (#7-544).

Commenter Information:

Jesse Lytle
Haverford College (jlytle@haverford.edu)
370 Lancaster Ave
Haverford, PA 19041 US

Comments entered:

Like so many Pennsylvanians, the Haverford College community has committed itself to addressing the emerging global crisis of anthropogenic climate change which puts at risk the health and economic wellbeing of all Pennsylvanians. Pennsylvania on its own is responsible for appx 1% of the world's carbon footprint. Methane is a potent greenhouse gas with an impact up to 80x that of carbon dioxide. The Commonwealth would be serving the long term best interests of the Commonwealth and all its residents by minimizing methane emissions. Timely regulatory action will make a bigger positive impact on the emissions that put the Commonwealth's future at risk.

No attachments were included as part of this comment.
