Comments entered:

I'm writing to support PA-DEP's proposal to set standards to protect public health from VOCs and climate pollution from oil and gas operations in Pennsylvania.

While these are a crucial step, I'm calling on PA-DEP to strengthen its proposal by closing existing loopholes for low-producing wells, remove provisions that reduce frequency of inspections for some oil and gas operators, and set these standards for all new and existing oil and gas operations.

Actually I would like to see fracking stopped entirely. We want to move asap to renewable energy, and the mysterious chemicals used in fracking are dangerous. It's better for many reasons to stop fracking and put resources into swiftly developing green energy.
