Comments entered:

Please do your job of protecting people from harm. I'm writing to support PA-DEP's proposal to set standards to protect public health from VOCs and climate pollution from oil and gas operations in Pennsylvania.

While these are a crucial step, I'm calling on PA-DEP to strengthen its proposal by closing existing loopholes for low-producing wells, remove provisions that reduce frequency of inspections for some oil and gas operators, and set these standards for all new and existing oil and gas operations.
