Comments entered:

I'm writing to support PA-DEP's proposal to set standards to protect public health from VOCs and climate pollution from oil and gas operations in Pennsylvania.

While these are a crucial step, I'm calling on PA-DEP to strengthen its proposal by closing existing loopholes for low-producing wells, remove provisions that reduce frequency of inspections for some oil and gas operators, and set these standards for all new and existing oil and gas operations.

It is unconscionable that at this time of climate crisis you would make such an environmentally irresponsible decision. Don't bow to corporate pressure. Protect the common good!!
